## GEPALUX® METALLIZED LABEL PAPER

Our GEPALUX® metallized papers are visually as effective as metal foils but are paper through and through.

The luxurious gloss, the excellent embossing properties and the superior white printing capability set the scene for premium brands in Wet-Glue-Label.

The vapor-deposited aluminum adds hardly any weight but offers outstanding designing opportunities, as well as all the processing advantages of paper.

All over the world, GEPALUX® papers are giving big name brand manufacturers visible added value. GEPALUX® papers from Glatfelter can be printed with all techniques, opaque or transparent, processed plano and at high speed and finally be washed off easily.

### GEPALUX®

- Beverage labels for returnable & one-way bottles
- Litho-offset-, flexo-, gravure-printing
- High gloss for wine & spirit packaging applications

Our comprehensive range of GEPALUX® metallized label papers are available from 68 gsm to 93 gsm for the above-mentioned applications and printing methods. Specific grades for UV-printing are available.

**For over 40 years, Glatfelter Metallized Papers have been giving a competitive edge to your premium brands.**
